Patent No. 6448390

GENERAL INFORMATION:

APPLICANT: The University of Tennessee, c/o Richard Cox
TITLE OF INVENTION: Stable Envelope Proteins for Retroviral, Viral and
TITLE OF INVENTION: Liposome Vectors and Use in Gene and Drug Therapy
FILE REFERENCE: 44137-5023, U. of Tennessee
CURRENT APPLICATION NUMBER: US/09/315,127

CURRENT FILING DATE: 1999-05-20

Sequence 12, Application US/09315127

Patent No. 6448390

FRENERAL INFORMATION:
APPLICANT: The University of Tennessee, c/o Richard Cox
TITLE OF INVENTION: Stable Envelope Proteins for Retroviral, Viral and
TITLE OF INVENTION: Liposome Vectors and Use in Gene and Drug Therapy
FILE REFERENCE: 44137-5023, U. of Tennessee
CURRENT APPLICATION NUMBER: US/09/315,127

NUMBER OF SEQ ID NOS: 23

SOFTWARE: Patentin Ver. 2.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 2, Application US/09902535;
Patent No. US20020102530A1;
GENERAL INFORMATION:
APPLICANT: Keith, Jr., James C.
APPLICANT: McCoy, John M.
TITLE OF INVENTION: Methods and compositions for diagnosing
TITLE OF INVENTION: and treating preeclampsia and gestational trophoblast;
TITLE OF INVENTION: disorders;
FILE REFERENCE: GIN-6006B4
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             40 RTRLPGNIDAPSYRSLSKGNSTFTAHTHMPRNCYNSATLCMHANTHYWTGKMINPSCPGG
